

GIAN RUBILLAR CABRERA

Software Developer | Public Health Analytics | Health Decision Support Systems
Davao City, Philippines | 09489073054 | gianrubillarcabrera@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Developer with experience building public health dashboards, reporting tools, and decision support systems using Vue, Node.js, Express, MySQL, MongoDB, and Power BI. Skilled in translating health data and partner requirements into usable digital tools for disease surveillance, analytics, rabies reporting, and evidence-based decision-making.

TECHNICAL SKILLS

Frontend: Vue 3, Vite, Tailwind CSS, Chart.js, HTML, CSS, JavaScript
Backend: Node.js, Express, REST APIs, JWT authentication, endpoint development
Data/Analytics: MySQL, MongoDB, Power BI, Excel, CSV/Excel processing, dashboard metrics
Tools/Hardware: Git, GitHub, Postman, VS Code, Cursor, Vercel, XAMPP, Arduino, NodeMCU, Blynk

PROFESSIONAL EXPERIENCE

Computer Programmer I | Mindanao Center for Disease Watch and Analytics, UP Mindanao | Aug 2024 - Present

- Develop and maintain public health dashboards and decision support tools supporting disease surveillance, analytics, reporting, and public health coordination.
- Build responsive Vue, Vite, Tailwind CSS, and Chart.js interfaces with emphasis on readable dashboards, visual hierarchy, and user-centered reporting flows.
- Design and support Node.js/Express endpoints integrating MySQL and MongoDB data sources for disease metrics, user access workflows, and dashboard components.
- Contribute to multi-disease analytics workflows for COVID-19, dengue, leptospirosis, tuberculosis, mpox, and rabies-related systems through data cleaning, aggregation, visualization, and reporting outputs.
- Maintain the RabDash DC platform for the City Veterinarian's Office by updating analytics charts, resolving bugs, and supporting weekly reporting needs.
- Support AI-assisted disease reporting through structured narrative summaries, multilingual outputs, caching improvements, and KPI-driven insights.
- Prepare system specifications, feasibility inputs, technical descriptions, formal reports, and partner-facing documentation for center proposals, trainings, and institutional activities.

Student Researcher | RabDash DC, University of the Philippines Mindanao | Mar 2023 - Jun 2024

- Developed and tested an Android mobile application centralizing rabies-related data from private veterinarians and the City Veterinarian's Office.
- Supported digitization of historical rabies vaccination records and assisted UI/UX and content updates for project-related web pages.

SELECTED PROJECTS

DiWA Disease Surveillance and Decision Support Dashboard - Vue, Node.js, Express, MySQL, MongoDB, Chart.js

- Built and refined disease dashboard modules combining analytics, charts, summaries, and location-based views; improved performance through caching, metric indexing, and reduced unnecessary data fetches.

RabDash DC Mobile Application - React Native, MySQL, vaccination records, rabies reporting workflows

- Supported mobile reporting workflows for rabies vaccination data capture, user training, documentation, and alignment of data fields with partner reporting requirements.

AI Hybrid Disease Reporting System - JavaScript, OpenAI API integration, caching, multilingual reporting

- Supported AI-generated summaries for disease indicators, regional patterns, and trends in English, Filipino, Taglish, and Cebuano; implemented caching to improve consistency and reduce repeated model calls.

Arduino and IoT Monitoring Systems - Arduino Uno, NodeMCU, GSM SIM900A, sensors, Blynk

- Developed water level, carbon monoxide, temperature, and humidity monitoring prototypes with SMS or mobile-app alerting features.

EDUCATION

Bachelor of Science in Computer Science | University of the Philippines Mindanao | 2024

- Cum Laude; Finalist - Best Thesis in Computer Science (Poster Presentation). **Thesis:** Dog Rabies Vaccination Reporting Mechanism for Private Veterinarians and the City Veterinarian's Office in Davao City Using a Centralized Pet Management Mobile Application.

TRAINING & LEADERSHIP

- Python Asia Conference 2026; UXPH 2025; PyCon Davao 2024; Mindanao Startup Summit; Pasyente Application User Testing.
- RabDash DC User Training: Assistant and Lead Trainer for system walkthroughs, workflow demonstrations, and user guidance.
- Sangguniang Kabataan Secretary, Barangay 26-C, Davao City; Finance Committee Member, UP Mindanao Society of Programmers and Refined Computer Scientists.
